

CorelDRAW X6 Font List

Below is a list of all the fonts supplied with the boxed version of CorelDRAW Graphics Suite X6. You should copy them all to your hard drive as described in the Fonts, Font Management, Typography and OpenType Success Kit.

The **G** shown in the file location paths below is the letter of your DVD-ROM drive. Each of the fonts is listed by the folder in which it appears. Thanks go out to Charles Kistler for his Fontlister utility that helped to compile the list.

Fonts List

There are a total of 1012 fonts available in the “Content” folder of the DVD. There are also 98 fonts included inside the CorelDRAW installer, but they are simply duplicates of fonts available on the DVD. The “installer” fonts are not listed here as they are buried inside of a CAB file and still have the old numerical file names instead of the new spelled out file names.

OpenType Fonts

American Captain 01 Regular g:\Content\Content\Fonts\OpenType – Latin, Central European, Cyrillic, Greek\American Captain 01.otf
